PROFESSIONAL SUMMARY

ASP.NET MVC / .NET Developer specializing in C#, ASP.NET MVC, Entity Framework (EF6), and SQL Server. Currently building internal student, HR, and examination portals at ICMA International with role-based access control, RESTful APIs, and production IIS deployments. Developed and deployed EduPrep, a production ASP.NET MVC examination platform with a multi-role architecture, automated exam engine, and subscription/enrollment workflow. Strong end-to-end .NET background, from SQL Server database design to production deployment.

EDUCATION

Bachelor of Science in Computer Science *2020 – 2024*

University of Sindh, Jamshoro

PROFESSIONAL EXPERIENCE

Web Developer | ICMA International | Karachi, Pakistan *August 2024 – Present*

- Developed and maintained internal web portals for students, HR, and exams using ASP.NET MVC and C#, improving operational efficiency.
- Built and integrated back-end services and RESTful APIs, and created responsive front-end UIs using HTML, CSS, Bootstrap, JavaScript, and jQuery.
- Implemented role-based access control using ASP.NET Identity, strengthening security and compliance across portals.
- Optimized database queries and indexes, reducing page load times by 50%, and led integration of a chatbot automation system that reduced helpdesk tickets by 25%.
- Deployed web applications to IIS and handled post-deployment maintenance, performance monitoring, and documentation of APIs and workflows.

SELECTED PROJECTS

EduPrep – Online Examination & Learning Management System *August 2026 – Present*

Live: eduprep.somee.com | GitHub: github.com/Bilalrasheed010/EduPrep

- Developed a multi-role platform for Super Admin, Admin, Teacher, and Student in ASP.NET MVC and C# with Entity Framework (EF6) and SQL Server, using BCrypt-based authentication and role-based access control.
- Built an online examination engine with a categorized question bank, timed exams, question palette navigation, auto-save/auto-submit, and automated grading and results.
- Implemented student enrollment and a subscription/payment workflow with payment proof verification and admin approval, plus dashboards and leaderboards.
- Deployed the application to production, including SQL Server database migration and a PowerShell/SqlBulkCopy-based data migration solution.

Learning Management System (ASP.NET MVC + SQL Server) *August 2024 – September 2024*

- Developed a complete LMS using ASP.NET MVC, C#, and SQL Server with role-based access for admin, teacher, and student, course management, secure login, and dashboards designed with Bootstrap and jQuery.

Chatbot Automation System (ASP.NET MVC + SQL Server) *December 2024 – February 2025*

- Built an intelligent chatbot delivering automated, context-aware responses via dynamic database queries, with a responsive C#/ASP.NET MVC interface.

Face Detection System (Python + OpenCV) *July 2024 – September 2024*

- Implemented real-time face detection using Python, OpenCV, and Haar cascade classifiers on live webcam video with low-latency processing.

Final Year Project – Advanced LMS (PHP Laravel) *November 2023 – February 2024*

- Built a capstone LMS in Laravel, Bootstrap, and JavaScript with quizzes, progress tracking, content uploads, and admin controls.

TECHNICAL SKILLS

Languages: C#, JavaScript, Python, PHP

Backend: ASP.NET MVC, ASP.NET Identity, RESTful APIs, Laravel

Frontend: HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX

Database: Microsoft SQL Server, MySQL, Entity Framework 6, LINQ

Tools: Git, Visual Studio, IIS, SQL Server Management Studio

Concepts: Authentication, Role-Based Access Control, Database Design, API Development, Production Deployment, Agile Methodologies

CERTIFICATIONS

- Google Advanced Data Analytics, Data Analytics, Cybersecurity, Project Management, UX Design, IT Support – Coursera
- Pro Python – Aptech | Web Development – NAVTTC
